# 交互式运行Python语句：超级计算器

## › 打开IDLE

在Python shell中输入`1+1`，按Enter键

立即看到运行结果，当计算器用

可以计算 $2^{100}$ ！超级大的数都没问题

# 交互式运行Python语句：打开新世界的大门

## › 第一行程序代码编写

在Python shell中输入

`print("Hello World!")`

```

The screenshot shows a Python IDLE window titled "Python 3.6.2 Shell" with a menu bar (File, Edit, Format, Run, Options, Window, Help) and a toolbar. The code editor contains the following Python code:

```
Python 3.6.2 Shell
*Untitled*
import random
menu = ["coffee", "tea", "cola", "milk", "water"]
>>> 1+1 print("Menu:", menu)
2
>>> 2** name = input("Your name please:")
1267650 drink = random.choice(menu)
>>> print("Hello", name, "! Enjoy your", drink)
Hello W
>>>
```

The code defines a menu of drinks, prompts the user for their name, and then randomly selects a drink from the menu to print out.
